

EUROPE MATCH

passion for fire

*you put
the flame
on it*

branding, which touches

Our Mission

To assist you with emotional "stories to touch" with your perfect branding, that's our job! With each match, that inflames – with each "click" of a Cricket lighter we create a piece of sympathy and recognition for your brand. True to the motto: "A mighty flame arises from many tiny sparks". We would like to inspire you! With ideas, best practice examples and individual 3D patterns. We do not offer you products only, but emotional concepts for dissemination of messages, with which you can generate high number of contacts inexpensively.

Our quality

Only a first-class product can leave a first class impression on your target group. We are aware of it and we take it very seriously. Therefore, we only select environmentally friendly raw materials. Our products pass through numerous quality checks during the production process. Independent compliance audits, eco and seals of approval as EN 1783, FSC, ISO 9001, ISO 9994 and GS ensure that you get a safe, environmentally responsible and reliable product that deserves to carry your brand message.

Our specialists in the design and development departments continuously develop new products, improve processes and methods. Our consulting teams are in close contact with the central office so that your opinion and criticism directly affects our innovations. Because we believe in customer focus as overall entrepreneurial approach and in the fact that a step forward is always a step in the right direction.

Dear customers!

So fast it can go: Yesterday was told the match is before an early end – today it is more alive than ever. Especially when it is about achieving a high range and frequency of contacts with your advertising message in a cost-efficient way. Because everyone needs fire! It is part of the celebrations, enjoy and a beautiful atmosphere. Hardly a household without lighter or matchbox. This makes them both to the omnipresent advertising media that surround your target group in the most important and most beautiful moments of life: the grill party with friends, the festive table with candlelight, the cozy get-together by the fire, the sparkler at New Year's Eve, the birthday cake, a nice atmosphere creating with scented candles, fire bowls and co. – everywhere needed and used: Fire!

Only few media are as low priced, get so close to a wide audience.

And these everyday companions are everything but boring. With a bit of imagination a book match or a lighter become an original brand ambassador. Countless design options ensure that your creativity can be limitless. And what makes us really hot - put your craziest ideas in fiery advertising. Our 3D design department is eager to implement individual designs for you. But our product designers have done their homework as well: elegant shapes, rocking fusion effects, bitchy colours, cool matt looks and glamorous metallics ensure that finally lighters and matches get rid of their boring image. New designs and colour schemes provide a stylish makeover! Let yourself be inspired.

Your Europe Match

Management

Anja Herzog

Rainer Thomas

IT'S A PERFECT MATCH

TRADITION MEETS EMOTION

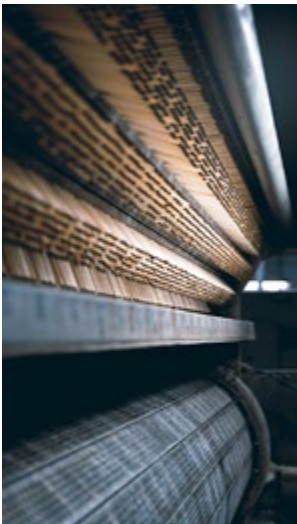

The synonym for fire? That's clear: matches! They are the core of our quality brand Europe Match. And a long tradition is related to them. Already around 950 before Christ the first precursor had been developed. At that time it was a more daring way to inflame fire because the in sulfur soaked pine sticks became inflamed at the slightest movement. No comparison to today's safety matches!

Throughout history alchemists, inventors and chemists had been advancing the wooden sticks. Finally Rudolf Christian Boettger invented the so-called safety match 1848. He sold his patent to the Swedish match industry. The Swedish "Zündholzönig" Ivar Kreuger founded the Swedish concern which had held the match monopoly in Germany up to 1983. The today's Europe Match GmbH was the outcome of this concern, founded in

2006 by the long-standing top managers Rainer Thomas, Anja Herzog and their companions. They acquired, inter alia, the production facility in Szeged (Hungary), and thereby more than 150 years of experience in match production. Here 1,5 million match boxes and book matches are produced daily. That is about 45 million matches per day.

100% Made in Europe

Emotion comes from Motion!

In 10 years, Europe Match has managed to have a traditional production grown into a successful think tank, which offers its customers emotions, attention and brand recognition for "little money". An important role is played by the 3D design department. Equipped with a CAD system, which allows to implement ideas into haptic objects by means of plotter, our creative minds develop igniting concepts for international customers. But the high level of technology and craftsmanship in our company ensures that we are particularly strong in creating specials.

Fire we make.

In order to be sure that our finished products do a good job for you until the end, they go through numerous quality checks throughout the production process. And above all, they are sustainably and environmentally friendly produced! Our matches are 100 % ecologically degradable. The ignition heads are non-toxic, the sticks of fast growing aspen and poplar, especially grown for this usage. We offer solid jobs and fair working conditions. And the same standards are also set in the production of the lighter brand Cricket.

We plead for more joke in advertising. Perfect for that: matches! Because they offer touchable originality. Whether punched in a special way, combined originally or surprising in shape, color or material – here are no limits to your ideas. And the cherry on the cake on top: our 3D design department shows you how your idea might look like, after realization. Ask us!

Cricket

we will
we will
ROCK YOU!

Oh, oh, oh, I'm on fire!

WE WILL
WE WILL

Everyday more than 200 million people in 140 countries use a Cricket lighter. Why? Sure thing: With Cricket advertisers decide for a premium product that offers the highest level of quality and safety: tested according to ISO 9001, ISO 9994, GS, user-friendly child resistant system, smooth friction wheel ignition/reliable piezo ignition. More than 60 quality controls during the production process. Manufactured in the EU (The Netherlands).

Hot stuff, baby!

ROCK YOU!

Outlasts about 2.000 times „click“ – sensual eye contact. How? The non-flammable, self-extinguishing nylon being used is not only heat resistant up to about 65 degrees Celsius, but also allows thin-walled tanks and therefore a 2 to 3 times higher gas content in comparison with lighters made of other materials. The self-regulating flame (Fixed Flame System) and tight-closing valves (to prevent gas leakage) do the rest. Well: Let's get out of the price comparison!

Hotter! than a fantasy

Do it! Create wildly and dangerously! With our finishing options your creativity is almost limitless! Realize screen and pad printing on all four sides, 360 ° motifs by digital sleeve or wrapping. PDF templates assist in prepress and presentation.

Next Ecotrend: **Less Waste**

Recycle,

Reduce, Reuse,

ECO TREND
LESS WASTE

To produce less waste as possible?

This is the motto of the zero-waste-ideology, which gets more and more fans under the young families in big European cities. In the line of the new trends: Matches from Europe Match made of recycling card board. Because they convince with a good eco balance and are 100 % biodegradable – can simply be composted. The alternative? Cricket Eco! These lighters are not only durable, but also made of recycling nylon!
